(Vice-President Oncology strategic Asset Management, GlaxoSmithKline)

Main features of GSK oncology research*

• **Dr Marc Bonneville**

(Head of Inserm U892, Cancer Regional Research Center, University of Nantes, France)

Cancer immunotherapy using $\gamma\delta$ T cell agonists

• **Dr Michael Lahn**

(Medical advisor, Lilly)

**Biomarker-based clinical development
in early phase oncology trials**

16h30 > 18h30

Session

4

Chairmen :

Christophe Thurieau
(Vice-President Research Ipsen)

Pr Eric Lartigau (Head of Radiation Oncology
Department, Cancer Comprehensive Center,
Oscar Lambret, Lille, France)

• **Pr Bertrand Tavitian**

(Head of Molecular Imaging Laboratory, Inserm U803 CEA, Orsay, France)

Molecular imaging techniques for the development of new therapies

• **Dr Dominic Spinella**

(Senior Director Oncology, Pfizer)

**Use of imaging-based pharmacodynamics
for dose selection and decision-making**

• **Dr Jean-Pierre Armand**

(Head of Cancer Comprehensive Center, Claudius Regaud Institute, Toulouse, France)

**Phases 0-1 trials in oncology, from the cytotoxics
to the targeted therapy**

• **Dr Hans Winkler**

(Director Biomarker Research, Johnson & Johnson)

Translational Research in early drug development

18h30 Closing remarks

• **Christian Lajoux** (President of Leem Recherche)

• **Pr Dominique Maraninchi** (President of INCa)

Mrs Valérie Pécresse
